Claim Rejections - 35 USC § 112

1. ClaimS 8-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a. Claim 8 is awkward "equipping with electronic component chips on a printed circuit board and so forth". Applicant should delete so forth because it is narrative. Applicant should be equipping a printed circuit board with chips instead of the way it is presently worded.
 - b. Claim 18 the limitations being cited after relationship, do not appear to be clearly reciting method steps. It is not clear what is taking the chips out or how they get to the chute portion. The cleaning of the external electrodes should be clearly set out in a method step.

Response to Arguments

2. Applicant's argument are moot in view of the new ground(s) of rejection .
 - c. The allowability of the claims is in question due to the 112 rejections and it will be reconsidered upon seeing the newly amended claims. It was clear the applicant fully responded to the last office action and Upon review of the Supervisory Patent Examiner these rejections were deemed necessary.
